HINTERHUBER & PARTNERS 2006 year in review

Innsbruck (Austria) – 12 February 2007 – Hans Hinterhuber, Chairman HINTERHUBER & PARTNERS, today commented on the company's year 2006 performance. "2006 was another excellent year for our company, with revenue growth again more than 20% above last year's already robust performance. All practice groups did well this year, with the FMCG and automotive practice groups doing particularly well. We saw strong demand for our activities in the areas of Strategy and Pricing and see this as an indication of our excellent work in this area, leading to high client satisfaction and retention rates. Regionally, demand from Asian customers, particularly customers from mainland China was strong, leading us to consider opening an office in Beijing in the course of 2007 to better serve our Chinese clients." On the outlook for 2007, Hans Hinterhuber commented as follows: "Booking for our consultancy services is strong, and there are indications that our growth will be held back more by internal capacity constraints – and our own quality standards – rather than external market demand. We are thus optimistic and look forward to another record year".
